

The Daily Gazetteer.

MONDAY, FEBRUARY 7. 1743.

This our last arrived a Mail from Flanders.

Stockholm, Jan. 24.

HE Secret Committee appointed for the Examination of the Generals Louwenhaupt and Buddenbrok, continued their Meetings during the Holydays, tho' we are ignorant of their Proceedings. The suspending the Affair of the Succession in the Diet was a Stroke of refined Policy, calculated to infuse a new Negotiation in favour of the Candidate who can be obnoxious to no Party but the House of Bourbon. Some will have it, that this Affair is already very far advanced, and that we shall likely see it introduced, and approved by the States. Military Preparations are carried on with inexpressible Activity; Troops march daily to the Rendezvous in Holland, and we are resolved to complete our Seamen to such a Degree, that the Fleet may not prove as inactive this, as the last Year.

Copenhagen, Jan. 26. We still continue to work on the Ship with an Application of which we have few Spares. After obliging all the Carpenters, as well as the Workmen that were in the City, to go to work in Stock, 600 Soldiers from our Garrison were added to them, in order to hasten the Equipment. Couriers and Couriers arrive from Stockholm and London, which shews there is something on the Carpet between their Courts and ours, and many of our Politicians will make it a Matter of great Importance. The French Minister, Abbé le Maire, receives now and then an Express from Paris; but such as have Sharp Eyes, have long ago observed, he is no more treated by our Ministry with Confidence as in former Days; and tho' his Intrigues put us on Arming, 'tis now pretty certain he will be glad to see a Calm.

Jan. 19. The vacant Archbishopric of Milan is said, is to be given to M. Visconti, Auditor of State. On the 14th Abbé Paluzzi, Agent of the Duke of Modena, entered a Protest against the Disposal of the Estates formed thereon by the Duke his Master. M. Guerini has succeeded to the vacant Bishopric of Brescia, having renounced that of Brescia.

Jan. 26. Since the Arrival of the last Count, Baron Erthal, the Elector of Mentz's Minister, has several Conferences at Court, but whether in relation to Peace, or to the private Affairs of his Master, is yet to be known. The Cavalry, Dragoons, and Hussars, are completely remounted and new cloth'd, so that it is impossible to conceive any Forces should be able to better Figure. We are taking all imaginable Care to furnish our Magazines on all Sides, and to make every Preparation for the Reception of our Allies, as well as for the Entertainment of our own Troops. We begin already to press hard upon the Enemy, as well on the Side of the Upper Palatinate, as of Bavaria; and it is generally understood here, that some considerable will be undertaken before the Arrival of French Recruits.

Feb. 5. The French work with incredible Diligence in fortifying all their Posts, and have raised a vast Magazine at Stadtamhof as were never seen in this Country. But notwithstanding this, they are extremely apprehensive of the Austrians making some Attempt even on that strong Post. Their Troops are fatigued and dispirited to the last Degree, tho' both their Pay and Allowance have been lately augmented. Marceille's Retreat has contributed exceedingly to the Accounts his Officers gave of the Treatment they met with from the Peasants, joined to the visible Detraction the Bavarians testify for them on all Occasions, which makes them dread an Engagement in this Country; and it is thought their Generals, sensible of this, will take all possible Measures to avoid it.

Feb. 8. It blew so hard a Storm the night before last at North-west, that the extraordinary Raging of the Elbe caused Yesterday an Inundation in the lower Part of this Town, where the Streets were, some five, some six Foot under Water. As yet we do not hear of any great Damage which the Storm has caused, but we are apprehensive that we may learn some Effects of it.

Feb. 7. The Sieur Bignon, Library Keeper to His Majesty, is appointed Counsellor of State on the Promotion of M. Dargenson. His Majesty has declared, that he will speedily fix the Days on which the Ministers of

State shall make their Reports to him of the State of their respective Departments. The Secretaries of State are for the future to follow the King in all his Journeys, in order to be the more at Hand to confer with his Majesty on all Occasions. Orders are issued for a considerable Body of Troops to march immediately towards Luxembourg, on Account not only of the Motion of the Auxiliaries on that Side, but also because the last Advices from thence say, that the Austrian Dragoons and Hussars posted at St. Hubert and Florenville, have actually made Inroads to the very Gates of Sedan.

Brussels, Feb. 12. On the 9th of this Month arrived a Courier from Vienna, with Advice, that her Majesty in compliance with the repeated Sollicitations of Count Harrach, Governor and Captain-General of the Low-Countries, had been graciously pleased to grant him his Dismission, accompanied however with such Marks of Esteem and Favour as are exceedingly honourable for his Excellency. Her Majesty has named Count Konigsegg Erps to have the Administration of Affairs in the Low-Countries, till the Arrival of Prince Charles of Lorrain, with the Title of Minister Plenipotentiary. The Equipages of Duke Aremberg are set out for Arlon, where he has fixed his Head Quarters. All the Auxiliary Troops are in full Motion, and we expect the Campaign will be opened very early.

HOME PORTS.

Dover, Feb. 4. Arrived the Nottingham, Watson, from Virginia.

Deal, Feb. 4. Wind W. S. W. Came down the Dispatch Tender; the Sally, Molles, the Apollo, Brown, the Endeavour, Ladd, and the Sea-Nymph, Branscombe, all for Mahon; the Mary, Reves, the Success, Kegwin, and the Henrietta, Jennings, all for Oporto; the Fanny, Tew, and the Khevenhuller, Hubbard, both for Antigua; and remain with the Monmouth, and Deptford Men of War, Shark Sloop, Mortar Bomb, East-India Ships, and the other outward-bound as per last. Arrived the Grand Hellenes, Lythes, from Bilbao.

Deal, Feb. 5. Wind W. Remain in the Downs his Majesty's Ships the Monmouth, Deptford, Shark Sloop, and Mortar Bomb; the Princess Amelia, Martin, the Exeter, Weston, and the Nonstop, Healsup, all for East-India. Came down the Ann, Wigg, for Jamaica; the Italian Merchant, Carteret, for Leghorn. Put back the Charles Tender.

Gravesend, Feb. 3. Pass'd by the George-William, Read, and the Neptune, Hindman, both from Jamaica; the Fleming, Dunkin, from St. Kitts; the Dolphin, Croftswaite, from Ostend; the Foxhunter, Haines, the Expedition, Pidgeon, and the Nancy, Chicken, all from Rotterdam.

LONDON.

The Court will go out of Mourning for the late Elector Palatine on Sunday next.

Letters from Flanders advise of the Death of Capt. Belguard, Son of Brigadier-General Belguard, of Well-Close Square.

On Thursday last died, at her House at Camberwell, Mrs. Barnes, a Widow Gentlewoman of considerable Fortune.

The same Day the Winchelsea Indiaman, Capt. Adair, falling down the River for Gravesend, ran foul of a Home-ward-bound West-Indiaman, carried away her Gallery, and did her other considerable Damage.

We are inform'd, that a Tavern in Aldersgate-street, noted for good Wine, will soon be vacated; which, it is said, is chiefly owing to the Gossiping Tales of an Old Stiffner of Linen.

On Saturday last a Presentation passed the Great Seal, to enable the Rev. Mr. Hugh Bavin to hold the Rectory of St. Thomas in Haverfordwest, in the County of Pemroke and Diocese of St. Davids.

As did also a Presentation to John White, M. A. of the Office of Treasurer of and in the Cathedral Church of St. Davids, void by the Death of Philip Bowles, M. A. being presented thereto by his Majesty.

Days appointed for holding the Lent Assizes for Norfolk Circuit.

Mr. Baron Carter,

Mr. Justice Wright.

THE ELEMENTS OF ALGEBRA, in a
New and Easy Method; with their Use and Applica-
tion, in the Solution of a great Variety of Arithmetical and
Geometrical Questions, by General and Universal Rules.
To which is prefix'd, An Introduction containing a suc-
cinct History of this Science.

By MR. NATHANIEL HAMMOND, of the Bank.

Extract from the Account of this Book in the Works of the
Learned.

The World has long complained of the Want of a proper
Introduction to Algebra. Some are so very concise, as if
they were contrived not to teach but introduce a Teacher;
others again are larger, but wrote with so little Condescen-
sion to the Understandings of such as are altogether unac-
quainted with the Science, that they are of very little Use
to those who are most inclined to make use of them. Whence
it comes to pass, that few find it practicable to make any
Progress in Algebra without a Master, tho' certainly the Sci-
ence in itself is far from surpassing a clear Head, and a toler-
able Understanding.

The Design of this Treatise, which is of a reasonable Bulk,
and which contains nothing which is not solid, and to the
Purpose, is to assist such as are engaged in teaching Algebra
with a regular Method, and a large Stock of Examples; so
that their Scholars may find Employment in their Absence;
and to enable such as live in Country-Places, and must con-
sequently want all other Tutors, except Books, to acquire
such a Skill in this Science, as may enable them to spend a
Portion of their Time agreeably in the Cultivation of their
better Parts, and in rendering a natural Method of enquiry
after Truth habitual.

The Treatise begins with a copious Explication of the
Fundamental Principles of the Art, and of the Signs and
Method of Notation used therein. The Author then pro-
ceeds to the several Rules, explaining them carefully and
copiously in all their various Cases; so that with a moderate
Attention it is simply impossible for a Person, who desires to
be Master of Algebra, to miss of his End.

We never find this Writer advancing any thing out of its
proper Place, or burthening the Mind of his Scholar with
Rules, before they become necessary: He professes to have
imitated the judicious Euclid in this Respect; and he has
done it with equal Art and Felicity. By this means he has
delivered the young Student in Algebra from that which is
usually the most fatiguing Part of the Science, viz. The
Doctrine of Surds, in the Manner in which it is usually
taught. By the same Means he leads his Reader directly to
Equations; and, by shewing him the Profit he will reap
from this Science, encourages him to overcome all its Diffi-
culties. But having thus laid a strong and rational Foundation,
he moves more slowly through the rest of his Work,
that whoever follows him, may be obliged to become Master
of ever Branch of the Art, so as to be a compleat Algebraist,
before he quits his Book, and not a Smatterer.

Quadratic Equations, and the Art of managing Converging Series, the admirable Invention of the incomparable
Newton, are here so clearly explained, and their several Ca-
ses so plainly set down, and so thoroughly explicated, that it
may be truly said, there are no where else such Instructions
to be met with. At the Close of the Book, we find abund-
ance of Observations, necessary for enlightening such Minds
as are willing to proceed still farther in analytic Discoveries;
so that considering the Completeness of this Work, and that too
is very moderate, it is as complete as possibly can be expect-
ed: And he who is thoroughly versed in it, will find no great
Difficulties, when he proceeds to sublimer Studies. The
Language is plain and natural, the Book is more copious
than any other in Examples, and the Illustrations of them
are so full and clear, that it is impossible to mistake their
Meaning.

TINCTURA MIRIFICA: OR,

The Admirable TINCTURE, which infallibly cures
STONE and GRAVEL, whether in the KIDNEY,
URETERS, or BLADDER. and also the Strangu-
Stoppage of Urine, and all Heat, Pain and Dis-
comfort in Making Water.

A Few Drops of it momentarily take
off the most excruciating Pains in the REINS
BLADDER, and certainly prevent their Return; for
infallibly cures that Distemper in an extraordinary Man-
ner, instantly removes all Uneasiness or Difficulty in making
Water, heals all Excoriations, and even Ulcers of the
Urinary Passages, relaxes the Ureters, so that small Stones
together with Gravel, and all mucous slimy obstructive
Matter may pass freely from the Kidneys, to be voided
visibly with Urine, without Pain; effectually cleanses the
Reins, Ureters, and Bladder from all Impurities, entire-
ly prevents the Stone in those who are troubled with
Gravel only; assuredly dissolves all large Stones, possible to
dissolve; and likewise brings all the Urinary Parts and
Passages to their due Tone and Vigour, so as perfectly
free the Patient from all the terrible Symptoms and mis-
able Effects of that torturing Disease.

It is the safest Medicine in the World, and not disagree-
able to take; the very first Dose of it absolutely cures the
most dreadful Fit of either Stone or Gravel, in a Minute,
giving such wonderful Relief and perfect Ease, as is indeed
very surprizing; and this great Number of Persons who
have experienced, to their infinite Satisfaction.

It is to be had only at Mr. Radford's Toyshop, at the Rose
and Crown against St. Clement's Church-Yard in the Strand
at 3s. 6 d. a Bottle, with Directions.

To Persons of either Sex
Afflicted with any Species of the PALSY, or
other NERVOUS DECAYS.

NEVER were NERVOUS DISEASES
PALSY, and PARALYTICK DISORDERS so frequent
of late than they have been, nor have the usual Remedies
been found adequate to those pertinacious Distempers: This
occasioned a Physician, who employ'd his Thoughts much ex-
cerning them, to adapt a Medicine, a Sovereign Elixir, pec-
uliar to, and effectual for, the Palsy, and all other nervous
Complaints now reigning, which after he had experienced
vast Numbers of Persons of both Sexes, and always with
surprising Success, even so as infallibly to cure by it the
Palsey, and all Paralytic Effects and Nervous Disorders,
he permitted it to be made publick for a general Good, that
for those labouring under these miserable Ailments, might
know where to meet with a safe and most certain Cure,
which it accomplishes in so short a Time, and with such Ease
and Pleasure (few Drops of it being a Dose, highly agree-
able to the Palate, and comforting to the Stomach and Bowels)
as is almost incredible to relate.

But the taking one Bottle of it only, demonstrates its
prodigious Efficacy to every one, and the Patients soon find
all Numbness, Deadness, and Shaking, or Resolution of the
Nerves, as well as all convulsive, cramp-like, or painful
Contractions of them, vanish and return no more; and thus
though these Diseases have been of many Years standing,
whether occasioned by long Illness, fast Living, hard Drinking,
or any other Cause; for it performs all that can be
wished for in Nervous Cases, creates an Appetite, expels Wind,
rectifies the Digestion, occasions laudable Chyle, attenuates
the Blood and Juices, causes a free and regular Circulation
of 'em thro' the Capillary Vessels, revives and invigorates the
Spirits, warms, comforts, strengthens, and replenishes the
Brain and whole Nervous System, hence the Sinews, Tendons
Ligaments, and all the enfeebled Parts are invigorated, the
Limbs restored to their pristine Steadiness and Strength, and
the Palsey and all Paralytic Disorders and Nervous Decays
suddenly cured by it, to the Admiration of the Patients
themselves, and all about them.

This sovereign and incomparable Elixir is permitted to be
sold only at Mrs. Holt's, at the Cross-Keys and Star below
the Royal Exchange in Cornhill, London, at 3s. 6 d. a
Bottle, with printed Directions at large.
